Subject: AMP EHC Proposed Action Plans

Importance: High
Sensitivity: Confidential

Gentlepeople:

Attached please find a proposed action plan (based on the collective input from the AMP Mechanistic Insight Meeting held May 16, 2001 and the EHCSS Next Steps Meeting held June 1, 2001) designed to provide mechanistic insight related to the role of AMP in the observed reductions in various smoke constituents and biological activity of the EHC with AMP paper. If you have any questions/comments please contact myself or Kent Koller. I will be responsible for collecting and organizing the chemistry data, and Robbie Elves will be responsible for collecting and organizing the biological data. Thank you for your input and assistance!
